

About Us

IP Organisers is an Australian company specialising in the provision of intellectual property support services to Australian and international companies, organisations and professional services firms.

IP Organisers is an independent service company of Phillips Ormonde Fitzpatrick, a well-known Australian firm of patent and trade mark attorneys.

Adding Value

Our services are extremely flexible. We can undertake research on any intellectual property of interest, or maintain a periodic watch at a frequency determined by you.

We generally provide reports by email, although documentation may be provided by post or courier. We can also report via secure websites maintained by us.

Our staff includes qualified patent and trade mark attorneys, lawyers, experienced researchers, investigators and intellectual property managers.

Our research is on target, efficient and relevant, because IP Organisers understands intellectual property!

IP Organisers understands intellectual property!

OUR SERVICES

Patents

Are you interested in assessing if an invention is patentable, if an existing patent is being infringed, or are you interested in technological developments in a particular field?

We conduct searches of patent registers to identify similar inventions to your own or in technology areas of interest to you. This searching can be narrowly focused or broadly designed, depending on your specific needs. Reports may include copies of patents and a plain-English analysis.

Trade Marks & Designs

We conduct searches to determine if a trade mark or design is registered, if it is being used, and if not in use, when use ceased.

This information may be used prior to registering a trade mark or design, or prior to applying for removal of a trade mark or from the register.

We also gather evidence of trade mark and design infringements including the use or production of counterfeit goods (see Investigations →).

Domain Names

We are able to research, investigate, register and manage domain names for clients. We can also assist you in dealing with cyber-squatters.

Investigations

IP Organisers is a registered investigation agency in the state of Victoria, with the ability to utilise a network of trusted associates in other states.

Our investigators gather evidence on violations of intellectual property rights using methods that include trap purchasing, the review of media coverage, photographing evidence of infringement, interviewing persons of interest and preparing witness statements.

Evidence is supported by documentation and sworn declarations, which can be used in court.

We also conduct background checks on companies, businesses (including business names) and individuals. We can identify participants in defined commercial sectors or technology markets.

Intellectual Property Management

IP Organisers provides you with cost-effective intellectual property (IP) portfolio management services, often eliminating the need for an in-house IP coordinator.

We manage your IP with your commercial interests in mind, and deal with the relevant people in your organisation in plain English – strictly no Legalese! We organise and manage our clients' IP portfolios via a secure client-only access web service.

Our IP management services are tailored to meet individual needs of our clients, whose management requirements are regularly reassessed to ensure that the value of their intellectual property is properly protected.

Intellectual Property Audit

The starting point for most IP management activities is a thorough review of all our clients' current and potential IP assets.

IP Organisers works with clients to identify their registrable rights, whether they be patents, trade marks or designs, and also unregistered rights such as copyright, trade secrets and common law trade marks.

We can work with you to assess whether or not your organisation has suitable policies and procedures in place to protect any emerging or existing IP, and if required, we can assist in formulating such policies and procedures for you.
